

JATAN PURI

Software Engineering Student | Frontend Developer | Full-Stack Developer | QA Automation
Karachi, Pakistan | jatanpuri5@gmail.com | linkedin.com/in/jatanpuri | github.com/JatanPuri5

PROFESSIONAL SUMMARY

Software Engineering student at SZABIST Karachi with hands-on experience building full-stack web and mobile applications, REST APIs, and automated QA workflows. Comfortable with React, Vite, Flutter, Node.js, Express, MySQL, MongoDB, and Docker-based deployments. Built and shipped projects including a complete SQE demo integrating Playwright E2E testing with live Jira issue tracking. Freelances on full-stack web apps, backend APIs, mobile projects, and AI/automation add-ons.

CORE SKILLS

JavaScript | TypeScript | Dart | Python | SQL | HTML | CSS | React | Vite | Flutter | Node.js | Express.js | MySQL | MongoDB | Mongoose | Playwright | Postman | Selenium | Jira REST API | Docker | Docker Compose | Git | GitHub | VS Code

EXPERIENCE

Freelance Software Developer

Fiverr | Ongoing

- Deliver full-stack web applications, backend APIs, and mobile builds for clients using React/Next.js, Node.js, PostgreSQL/MySQL, JWT auth, and Flutter/Dart.
- Build AI and automation add-ons including OCR, scraping, and LLM integrations.
- Manage direct client communication end-to-end, including requirement gathering, architecture, progress updates, and revisions.
- Adapt quickly to client-specific tools and project requirements through direct project work.

SELECTED PROJECTS

Bug Tracker Lite

Full-Stack QA/SQE Automation Platform

- Built a full-stack bug-tracking application using React (Vite), Node.js/Express, MongoDB, Docker, Playwright, and the Jira REST API.
- Demonstrated an end-to-end Software Quality Engineering workflow: Jira user stories to development, containerized deployment, automated testing, and status sync.
- Integrated the Jira REST API v3 so every bug reported in the app automatically creates a linked Jira issue, and marking a bug "Resolved" auto-transitions the Jira issue to "Done."
- Containerized the full stack with Docker Compose for one-command local and demo deployment.
- Automated 5 end-to-end test cases with Playwright covering bug creation, validation, status updates, filtering, and deletion, and wired test runs into an automatic Jira status-update script.
- Implemented secure environment-variable handling for Jira credentials and database URIs, keeping all secrets out of version control.

SpendWise

Cross-Platform Expense Tracker

- Developed a full-stack personal finance application with a Flutter frontend and a Node.js/Express REST API backend.
- Supported Android, iOS, web, Windows, Linux, and macOS through Flutter.
- Implemented JWT-based authentication with bcrypt password hashing and protected API routes for transaction and budget endpoints.
- Designed a relational MySQL schema for income and expense transactions and budgets.
- Built a dashboard summary and analytics screen using fl_chart.
- Documented and tested all endpoints with a Postman collection.

E-Commerce Cart SPA

- Built a single-page e-commerce style application with a React/Vite frontend and a lightweight Python backend module.
- Implemented dedicated cart functionality and maintained a clear frontend, backend, and documentation project structure.
- Documented manual test steps for the application.

EDUCATION

- Bachelor of Science in Software Engineering (BSSE), In Progress — SZABIST Karachi
- Relevant coursework: DSA, OOP, Database Systems, Software Quality Engineering & Testing, Web App Development
